

III EDITION
19-21 OCTOBER 2016
— BOLOGNA ITALY

EXPOTUNNEL: THIRD EDITION IN BOLOGNA, OCTOBER 19-21, 2016

ExpoTunnel, the Underground Technologies and Major Works Exhibition is coming up!

The third edition of the exhibition takes place in **Bologna** on **October 19-21, 2016**. As announced during the ExpoTunnel Convention 2015 in Milan, the exhibition will be part of **SAIE Building and Construction Platform**, dedicated to the infrastructures and the engineering of the built environment.

SAIE Building & Construction is a great platform with the largest display of Italian building technologies and equipment for the building site. It takes place on October 19-21 and it is composed by ExpoTunnel and

other 6 exhibitions of the construction field.

In the first two editions, ExpoTunnel has revealed the role of the underground construction and infrastructure industry, and for the third edition it aims to be a venue for a dialogue, discussion and analysis of the opportunities. The third ExpoTunnel wants to consolidate the work that has been done in the last 2 editions and to expand its international dimension by promoting the Italian system and the latest technology in the underground industry worldwide.

During 2015 ExpoTunnel organized the **Convention ExpoTunnel Milan** with the collaboration of **SIG – Italian Tunnelling Society** and promoted the third edition at World Tunnelling Congress in Dubrovnik and at the STUVA Conference in Dortmund.

Showcase your company at ExpoTunnel

The countdown has begun: **ExpoTunnel 2016 registrations are officially open!**
