Tunneling tools by Wimmer

New projects: special hydraulic cutter

Location:
Liverpool Street Station

New projects: special hydraulic cutter

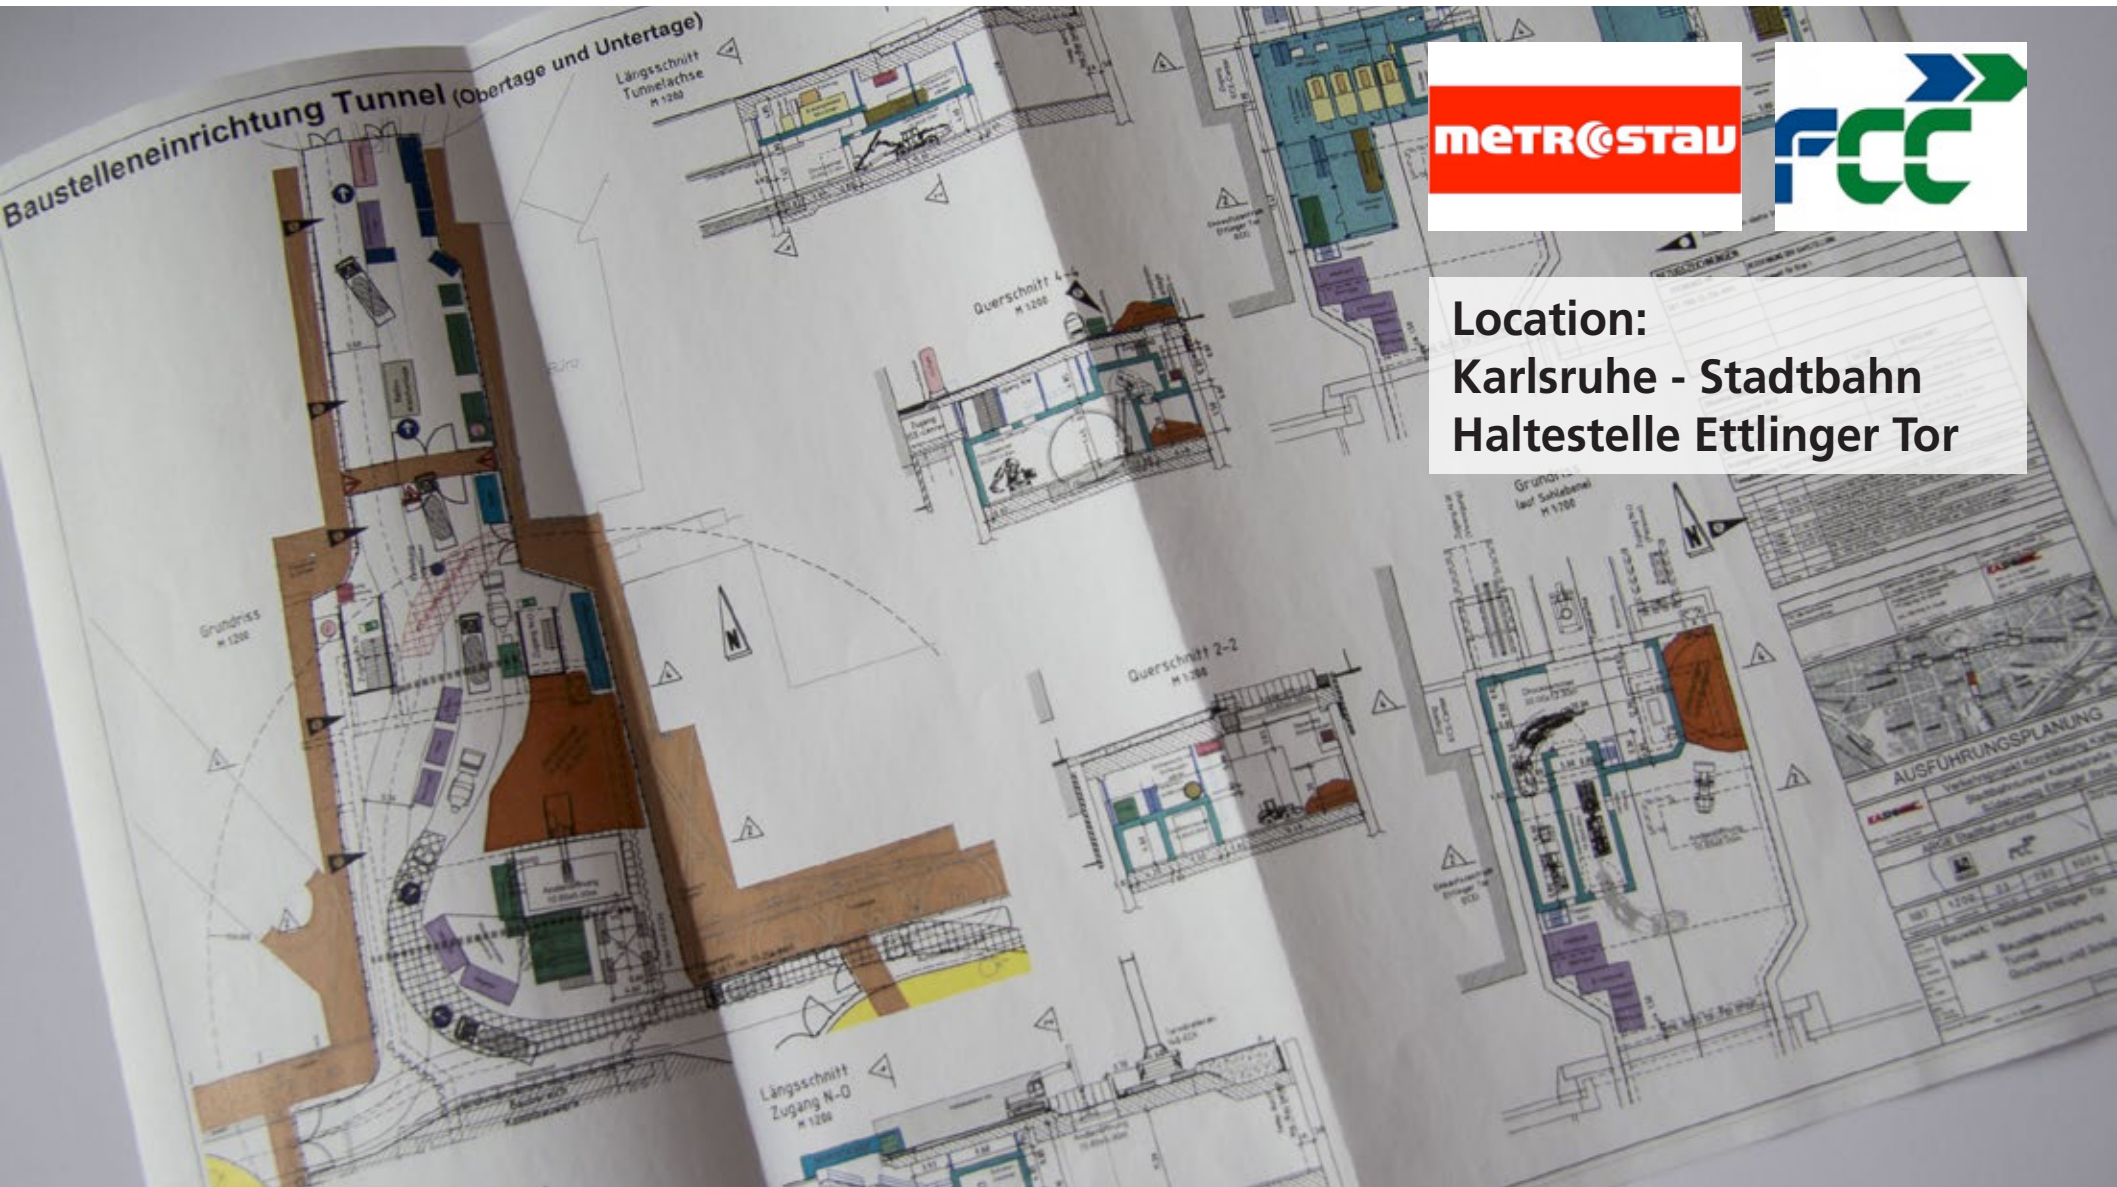

The customer's specification was a hydraulic cutter, which could mill a small profiling depth (3mm).

We constructed two profiling discs to allow the customized depth.

To minimize dust creation, we installed a water spray system.

New projects: work basket

Location:
Karlsruhe - Stadtbahn
Haltestelle Ettlinger Tor

New projects: work basket

To establish and fix the tunnel arch the customer used a rope and two people baskets.

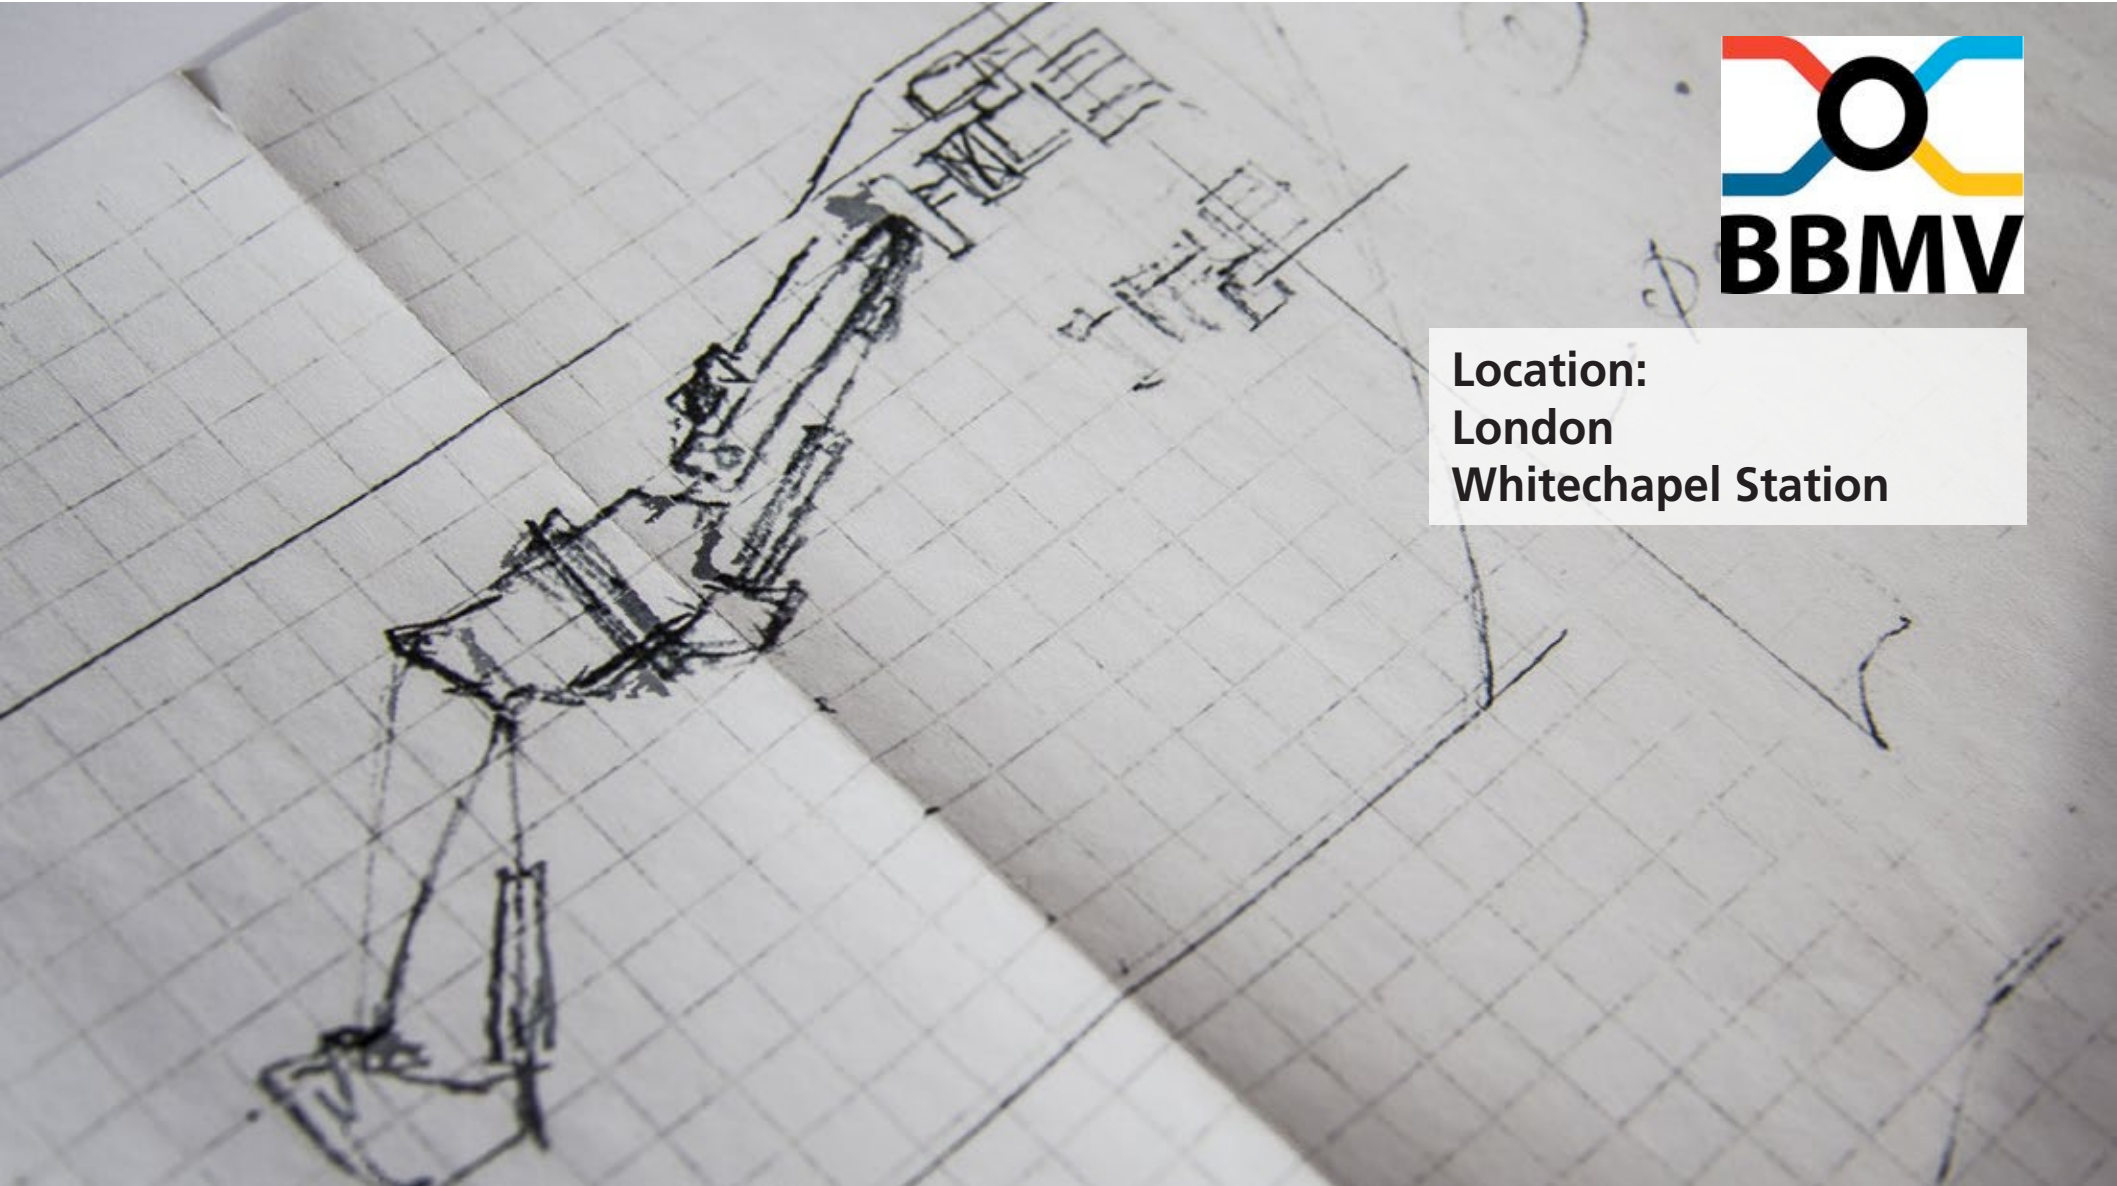

New projects: work basket

Because the client no longer had enough space for this application, we constructed a safe working platform with included lifting device.

New projects: grapple

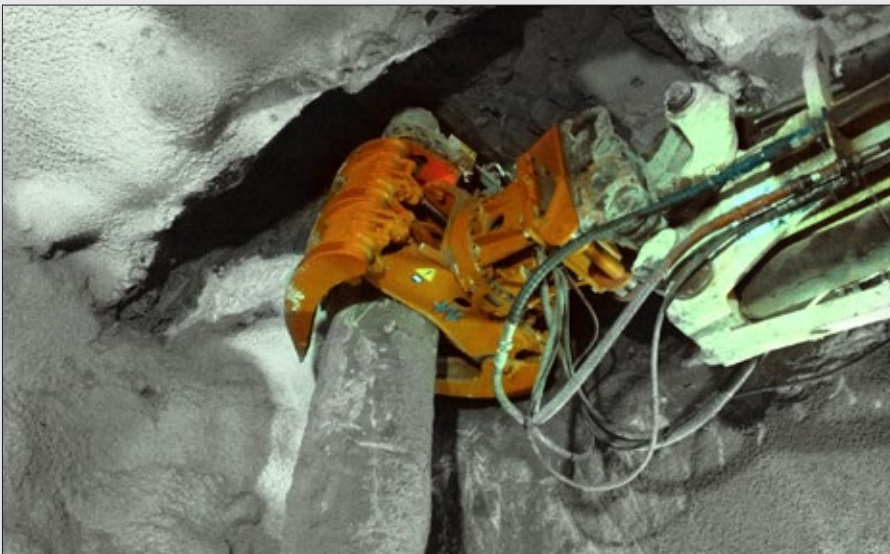

Location:
London
Whitechapel Station

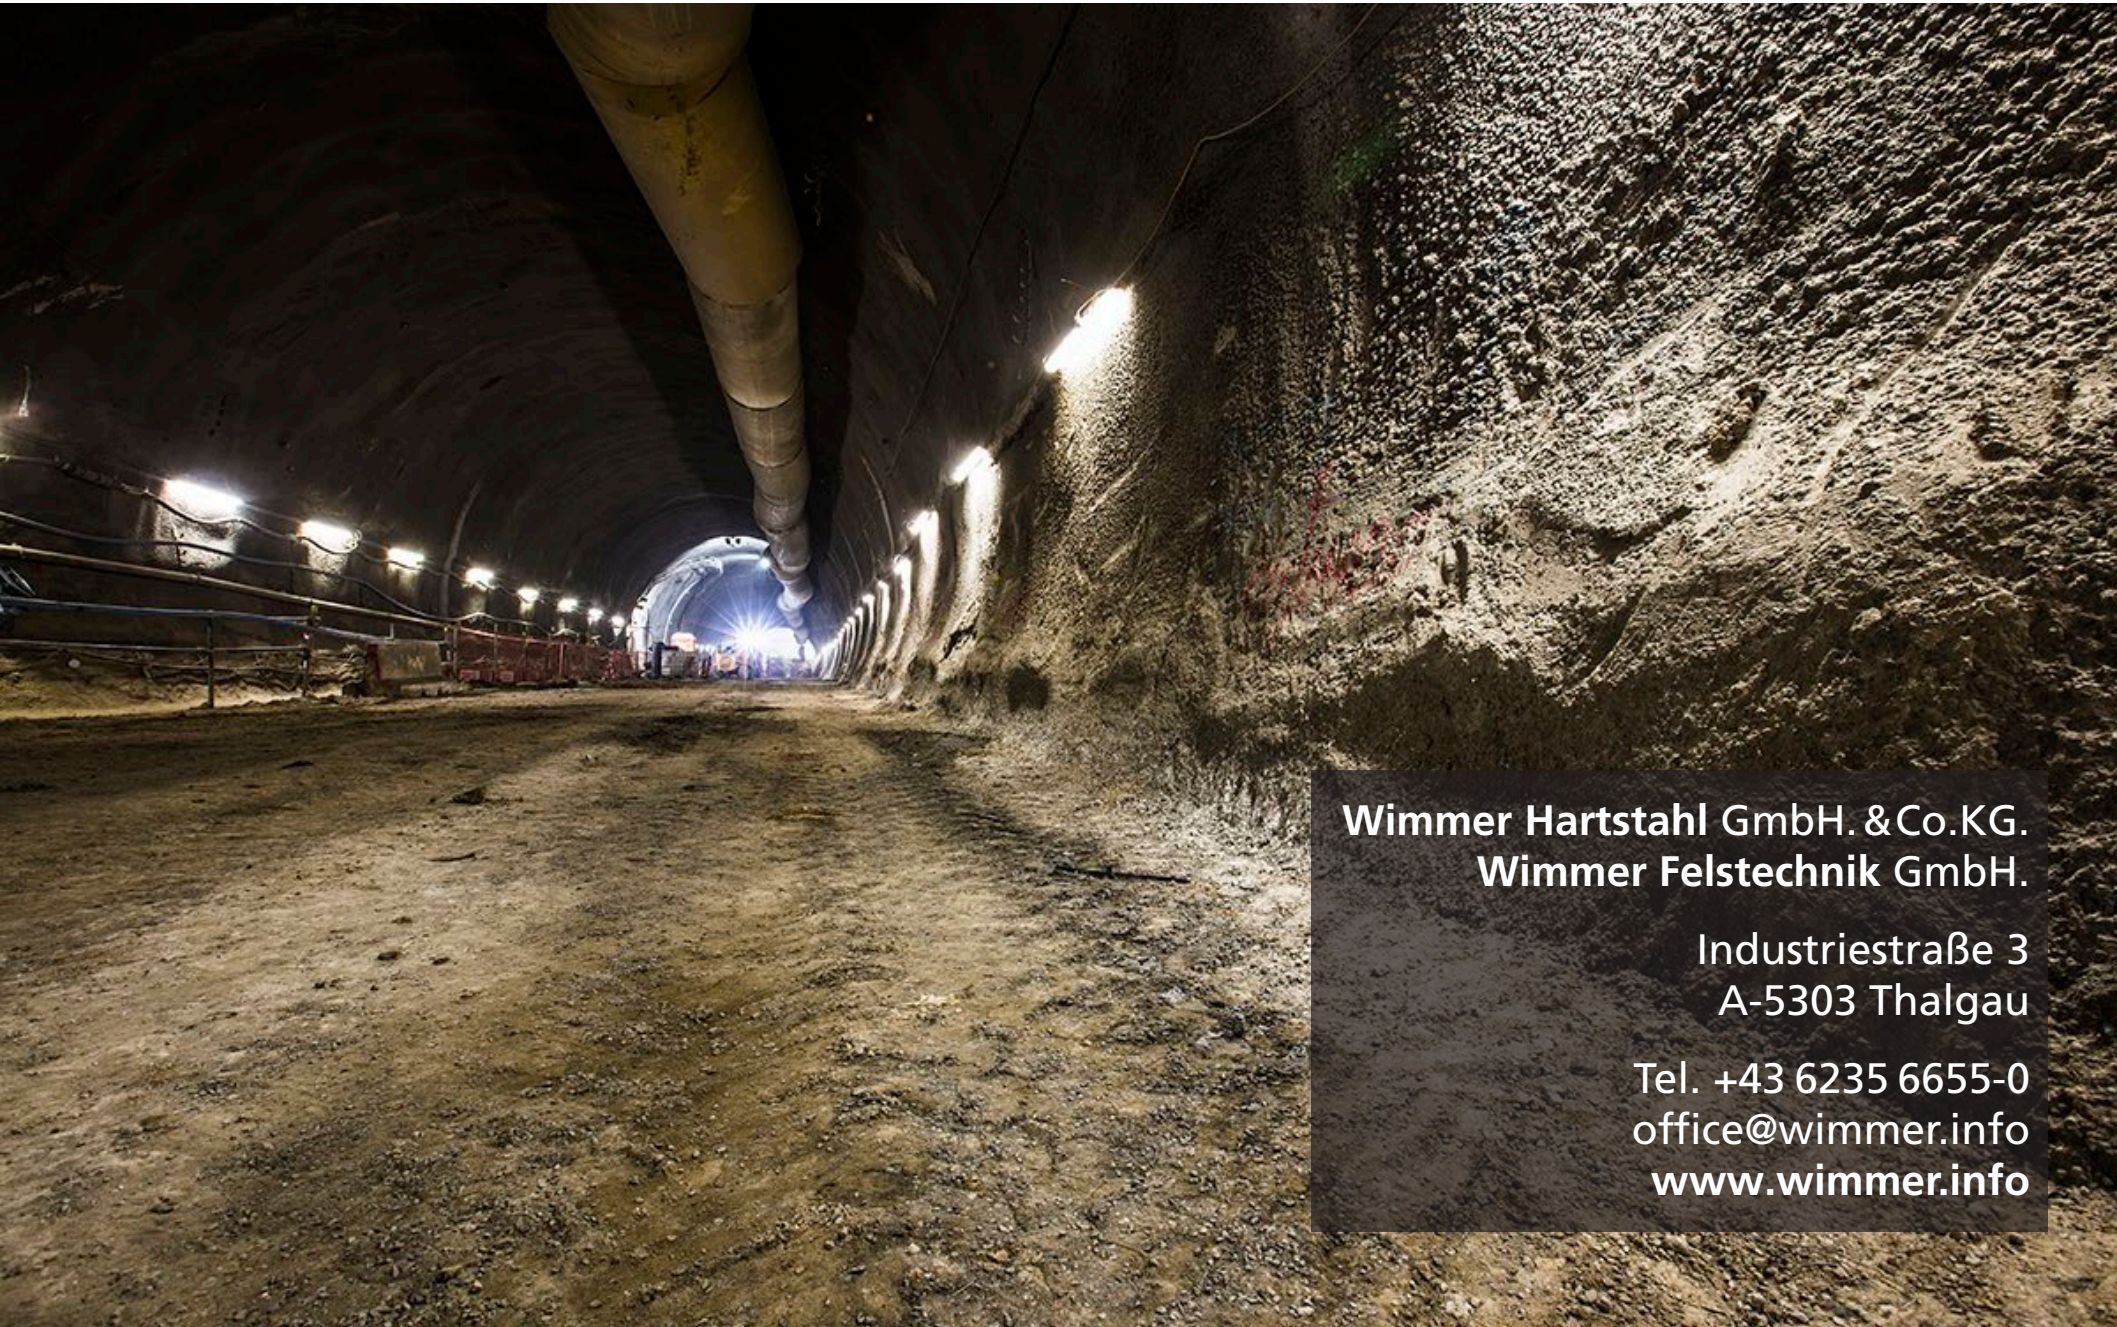

New projects: grapple

The customer's requirement was to develop a special grapple, which should be able to cut concrete piers.

Template was our grapple „Octopus“ with integrated chainsaw.
